

## Takakita 3X3 Round baler Model RB-981NSF (Small Farm)

For years our customers were asking for a reliable 3ft x 3 ft round baler with net wrap but self-contained hydraulics and low horsepower requirements. We contacted Takakita from Nabari, Japan (<http://www.takakita-net.co.jp/english/>) and they now produce an exclusive high quality machine for Small Farm Innovations

### Features

This baler has its own hydraulic pump and uses a 10WT hydraulic oil or powers steering fluid

Control Box is having has a magnetic base that can be placed anywhere and must be connected to a 12-volt source

Baler is a fixed chamber which means the size of the bale is fixed but the weight can be changed. This baler uses a large steel chain belt so you do not have to worry with a rubber belt breaking or catching on fire. This baler also has a kicker so you do not have to back up to discharge a bale like other round balers.

Baler has fewer moving parts than other fixed chambered balers

Doors easily rotate up to provide easy access for service  
No expensive electronic sensors all over the baler than could cause delays.

Baler has three density settings that is easy to change. Bale weight 150-350 LBS depending on Density settings and moisture content.

This baler requires little skill to operate. Just wait for the horn on the control box to sound, then stop moving forward, turn and watch the roll of net wrap. When the roll of net wrap stops turning, the bale is complete and ready to be discharged from the baler.

### Specifications

- Height 78 inches
- Length 124 Inches
- Width 73 Inches
- Pickup Width 33.5 Inches
- Weight 2900Lbs
- Net Wrap 36 Inch
- PTO Horsepower Required 25
- Hitch Category #1 two point
- Bale Weight 150-350 LBS depending on Moisture Content
- Pick up height controlled by three-point hitch
- Method of bale forming Chain Belt
- Country of Origin Japan
