

Takakita RB511 DX Industrial Grade Mini Round Baler

Features

- Widest pickup in its class
- Can easily bale tough tall material and well as leafy legumes
 - Automatic twine wrap
 - Fast hydraulic operation
 - 30-50 lb bales
 - 17 minimum hp required
 - Manufactured in Japan

This industrial baler is the only mini round baler that uses a forming chain instead of rollers. Roller type balers struggle with taller forages like Sudan grass, pearl millet, and Johnson grass. This baler is also able to bale cornstalks and is gentle on legumes.

Tractor must be able to lift 900 lbs. to safely operate this baler. The RB511DX has a heavy-duty chain drive pickup with shear-bolt overload protection. The pickup is nearly 36 inches wide which is the widest pickup in its class. Wider pickup makes the baler easier to operate and more productive.

Mount	3-point hitch category #1
Weight	816 pounds without twine
Length	53.54 Inches
Width	55.90 inches
Height	47.25 Inches
Bale Diameter	20 Inches
